WE LIVE FOR THE WINTER

The days are shorter.
The lakes are frozen.
The wait is over.

Cold air fills the lungs.
Frost bites the skin.
All senses awaken.

Start of the engine.
Squeeze of the throttle.
Gateway to our realm.

Where titles don't matter.
A place free from chatter.
A true purpose to be found.

This is what we work for.

This is what we live for.

ROTAX® ENGINES

ROTAX 2-STROKE ENGINES

Heart-thumping power, lightweight design, proven reliability—E-TEC® direct-injection engine technology delivers the most sought-after attributes in the snowmobile industry.

With the E-TEC engine lineup, you get:

- Industry-leading fuel economy¹
- Excellent oil economy
- Virtually no smoke or smell
- Light, linear throttle pull
- Automatic summerization process

850 E-TEC TURBO R

- 180 hp up to 2,400 meters²
- World's most powerful factory-built 2-stroke turbo

850 E-TEC

- 165 horsepower²
- Down to 12.3 L/100 km²

600RR E-TEC

- 125 horsepower²
- Down to 11.3 L/100 km¹

E-TEC engines are the best-selling 2-stroke engines in snowmobiling.³

ROTAX ACE™ 4-STROKE ENGINES

With the Advanced Combustion Efficiency (ACE) family of engines, BRP engineers optimized the combustion system, reduced mechanical friction and freed intake and exhaust breathing. The result is the most efficient line of engines in snowmobiling. Not only are they efficient, they're a pleasure to operate and own. Very little maintenance is required; they run smoothly and produce a nice, solid—yet quiet—sound.

900 ACE TURBO R

- Rotax-designed turbocharger
- 180 horsepower²
- Cable-activated throttle with reconfigured iTC™

ACE engines are the best-selling 4-stroke engines in snowmobiling.³

INTELLIGENT THROTTLE CONTROL

Standard on the ACE engines, the iTC system delivers a whole different snowmobiling experience.

- **Driving modes:** Standard mode ensures a smooth start and linear acceleration; Sport enables full performance and quicker acceleration; ECO® limits top speed and acceleration rates for a more relaxed, fuel-conserving ride.
- **Finger throttle** (only on 600 ACE and 900 ACE engines without Turbo): The throttle block can be rotated forward for use as a finger throttle, if preferred. Great for changing hand positions on a long ride and for more control through bumps.

¹ Data based on internal engineering trail testing.

² Observed metric horsepower based on internal dyno test performed in optimal conditions.

³ Based on retail sale results as of December 31, 2025.

Experience the advantage of XPS. Oil and care products engineered to extend the life of your ride, tested in the world's harshest conditions and designed to optimize your vehicle's performance. Learn more at [XPSlubricants.com](https://www.XPSlubricants.com)

BRP XD Roller

The **BRP XD roller** withstands 4 times the load in compression compared to most popular aftermarket thermoplastic-type rollers with a displacement/deformation of 0.5 mm.

QRS XD rollers are built to take a beating. With more impact resistance and less deformation than standard designs, they hold up under pressure, protect belt performance, and keep the pulley system running clean and smooth, ride after ride.

BUILT TOUGH TO KEEP POWER MOVING

Stronger than fiber rollers and more stable than thermoplastic designs, QRS XD rollers resist high-impact shocks and deformation that can seize pulleys or shred belts. A major upgrade for reliability, durability, and consistent performance under stress.

BRP XD Roller

Thermoplastic Type Sample 3

Thermoplastic Type Sample 2

Thermoplastic Type Sample 1

Fiber Type Sample 2

Fiber Type Sample 1

The **BRP XD rollers** performed 40% more cycles* than the average for thermoplastic-type rollers and 99% more cycles* than the average for fiber-type rollers. Both thermoplastic and fiber roller tests ended in failure.

*Based on 20,000 cycles of our XD rollers, without any signs of failure.

What differentiates the Advex helmet from the Oxygen? For one, the Advex is designed for the more active rider. Thanks to the M-FORGE® Composite shell, it delivers the same incredible performance and protection. But where it shines is in versatility: With a superior humidity management system, the Advex excels in a variety of weather conditions. Plus, the Advex's Jet-Style design means easier face access, an improved noise reduction system and an edgy look.
